Associate Professor, University of Ottawa
Active Staff, Department of Radiology, The Ottawa Hospital
Director of Abdominal and Pelvic Imaging, The Ottawa Hospital
Ottawa, Ontario

“Complications After Bariatric Surgery”

Tuesday, November 3rd - 6 pm

Campbell Auditorium Room T2202 - Level 2 - Juravinski Innovation Tower
St. Joseph's Healthcare Hamilton

OBJECTIVES

1. Compare different types of weight loss surgeries including their normal post operative appearances.
2. Identify early imaging findings of complications related to bariatric surgery.
3. Explain additional imaging techniques that can help diagnose early complications from bariatric surgery and help guide appropriate management.

OTN Event #: **49391125**

“MRI of Acutely Ill Pregnant Patients”

Wednesday, November 4th, 2015
7:30 am

Campbell Auditorium Rm.T2202 St. Joseph's Healthcare
Level 2 - Juravinski Innovation Tower

OBJECTIVES

1. Recommend imaging algorithms for appropriate and efficient work up of acute abdominal symptoms in pregnant patients.
2. Compare different MRI sequences and protocols available for imaging pregnant patients with acute abdominal symptoms.
3. Identify common abdominal abnormalities on MRI sequences in pregnant patients.

OTN Event #: **49391629**

“Abdominal Errors in the ER: a Canadian Perspective”

Wednesday, November 4th, 2015
12 noon

Campbell Auditorium Rm.T2202 St. Joseph's Healthcare
Level 2 - Juravinski Innovation Tower

OBJECTIVES

1. Explain why imaging errors occur in acute settings and suggest ways to reduce them.
2. Identify and differentiate different types of errors that occur in abdominal imaging.
3. Recommend ways of reducing potential areas for errors in the emergency radiology setting.
