Department of Radiology Faculty of Health Sciences McMaster University

## **EMERGENCY RADIOLOGY** Visiting Professor Series

## Douglas S. Katz, M.D, FACR, FASER, FSAR

(Fellow of the American College of Radiology, American Society of Emergency Radiology & Society of Abdominal Radiology) Professor of Radiology, Stony Brook University, School of Medicine Vice Chair for Research, NYU Winthrop Hospital Mineola, Long Island, New York

## Tuesday, February 5th, 2019 St. Joseph's Healthcare Hamilton

CAMPBELL Auditorium – Level 2 – Room T2202 Juravinski Innovation Tower **6:00 pm** 

# "Imaging of the Acute Abdomen in Pregnancy"

## Upon completion of this lecture, participants should be better able to:

- 1. Review the current protocols for imaging of the more common potential non-obstetrical disorders presenting with acute abdominal pain pregnancy
- 2. Discuss the strengths and limitations of cross-sectional imaging modalities for these diagnoses, with an emphasis on sonography and magnetic resonance imaging
- 3. Demonstrate examples of these disorders, including complications, and to discuss the potential pitfalls in diagnosis both clinically and on imaging

  OTN Event ID: 108177046

"Pitfalls of Bowel Interpretation on 'Routine'
Abdominal and Pelvic CT"
Lecture Update

Date: Wednesday, February 6th, 2019

**Location:** SJHH: Campbell Auditorium - Level 2 – Rm.T2202

Time: 7:30 am

<u>Upon completion of this lecture, participants should be better</u> able to:

- Review the literature of the potential pitfalls on interpreting 'routine' abdominal and pelvic CT, especially in the luminal setting, when evaluating the luminal gastrointestinal tract
- 2. Discuss the potential causes and mimics
- 3. Offer guidance in the differentiation and interpretation of these entities

OTN Event ID: 108205638

"CT of Regional and Diffuse Small Bowel Disorders: Pitfalls and Pearls"

Date: Wednesday, February 6th, 2019

**Location:** SJHH: Campbell Auditorium - Level 2 – Rm. T2202

Time: 12:00 pm

<u>Upon completion of this lecture, participants should be better</u> able to:

- Demonstrate a series of common as well as uncommon and unusual regional/diffuse disorders of the small bowel, on CT examinations
- 2. Briefly review the clinical and CT literature of these entities
- Discuss the differential diagnosis of these entities, with an emphasis on narrowing the differential based on historyand associated findings
- 4. Provide 'pearls' for diagnosis of these regional and diffusesmall bowel entities on CT, as well as to discuss potential pitfalls in accurate diagnosis and management
